Mindy as you requested here is the doc. Whitney and I tried to explain about bubble comments. I think one way forward may be for us to send up through Dave et al a doc with the bubble comments where we expect them to add info and why, but what we share with ACHP and the tribes does not have the bubble place holders. Even if we do a coverletter for Dave, this seems to really help minimize comments that may tip the scales and result in the tribes and/or ACHP feeling like they are given a final doc to just sign vs consultatively crafting it together.
